

April 2, 1970

Dear Gary (cc: HJ),

Thanks for your letters of 3/19 and 29.

Your 3/19: I know nothing about (a) anything else Liebeler may have done (b) Forrestal's death.

Figure the cost of the COUP appendix at 3¢ per page.

Sylvia is still working on the case, and in touch with me regularly but not frequently. (She also got a copy of the 2000 pages of Gemberlign CD's from Lifton.) She just sent me a note that the 150 E. 35th St. address in CE 2812 is, among other offices and residences, Wm. Buckley's National Review Curious.

Do you want the H.O. transcripts full size or 2-on-1? Do you really want 2 copies of the whole thing? (A total of about 2100 pages.) Much of it isn't worth copying even once, except for historical interest. Since Harold has a copy, I would be glad to lend you my copy so you can decide what you want. (I will copy Clinton, Shaw, Frazier, and Finck as soon as you specify 2-on-1 or full-size.)

Mary hasn't mentioned to me any of the details of her son's illness. I hope you can help her.

Any specific suggestions for things I should do at the Archives? I hope to be able to spend at least a week there, after the APS meeting, but I will have to get back to physics pretty quickly. High-energy physics is having major money troubles and, although grad students will be the last to go, I don't want to stick around too long.

Sincerely,

*Paul*

PS: Sylvia expects the forthcoming book by Al Newman, which nobody knows anything about, ~~to~~ to be some sort of psychological study - Freud plus Hartogs. If that's the key to the case I think I'll save my money.
